Authentication Required

Authentication is required to install untrusted software

vbox

Password

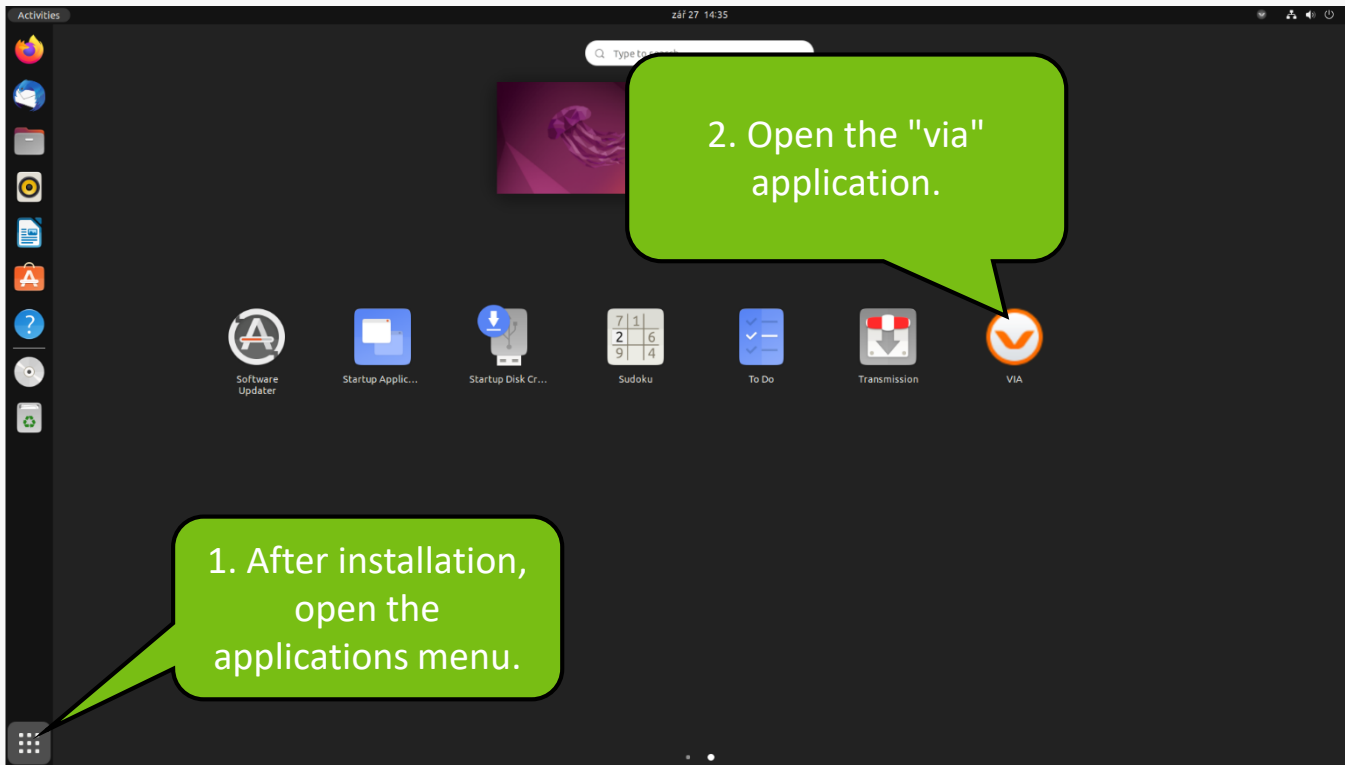

Cancel

Authenticate

1. Enter the device user password here.

2. Then continue here.

1. After installation, open the applications menu.

2. Open the "via" application.

Click here to download the VPN profile.

Virtual Intranet Access

Download VPN Profile

Sign in to download your VPN Profile

[Download](#) [Cancel](#)

Enter "*via.mendelu.cz*" as the address. Then download the profile.

In case of this message, click "Continue".

Virtual Intranet Access

Download VPN Profile

Sign in to download your VPN Profile

via.mendelu.cz

login

.....

Download Cancel

The address remains the same. Additionally, fill in the UIS login and password. Then click on "Download".

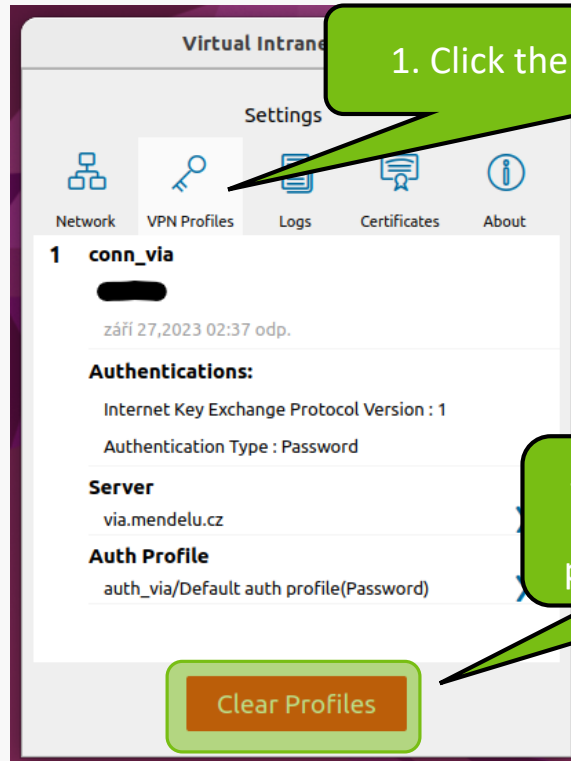

Assuming the correct procedure, you will be connected.

VPN troubleshooting

Click on Settings.

1. Click the VPN profile menu.

2. Delete the profile and repeat the process from slide 8.

Clear Profiles

1. If, after downloading the profile again, the connection fails again, open the settings again and go to the third **Logs** tab.

The screenshot shows the 'Virtual Intranet' settings interface. The 'Settings' header is visible, with a navigation bar containing icons for Network, VPN Profiles, Logs, Certificates, and About. The 'Logs' tab is selected, displaying a list of log entries. At the bottom of the screen, there are two buttons: 'Send Logs' (green) and 'Clear Logs' (red).
